

ASX Release

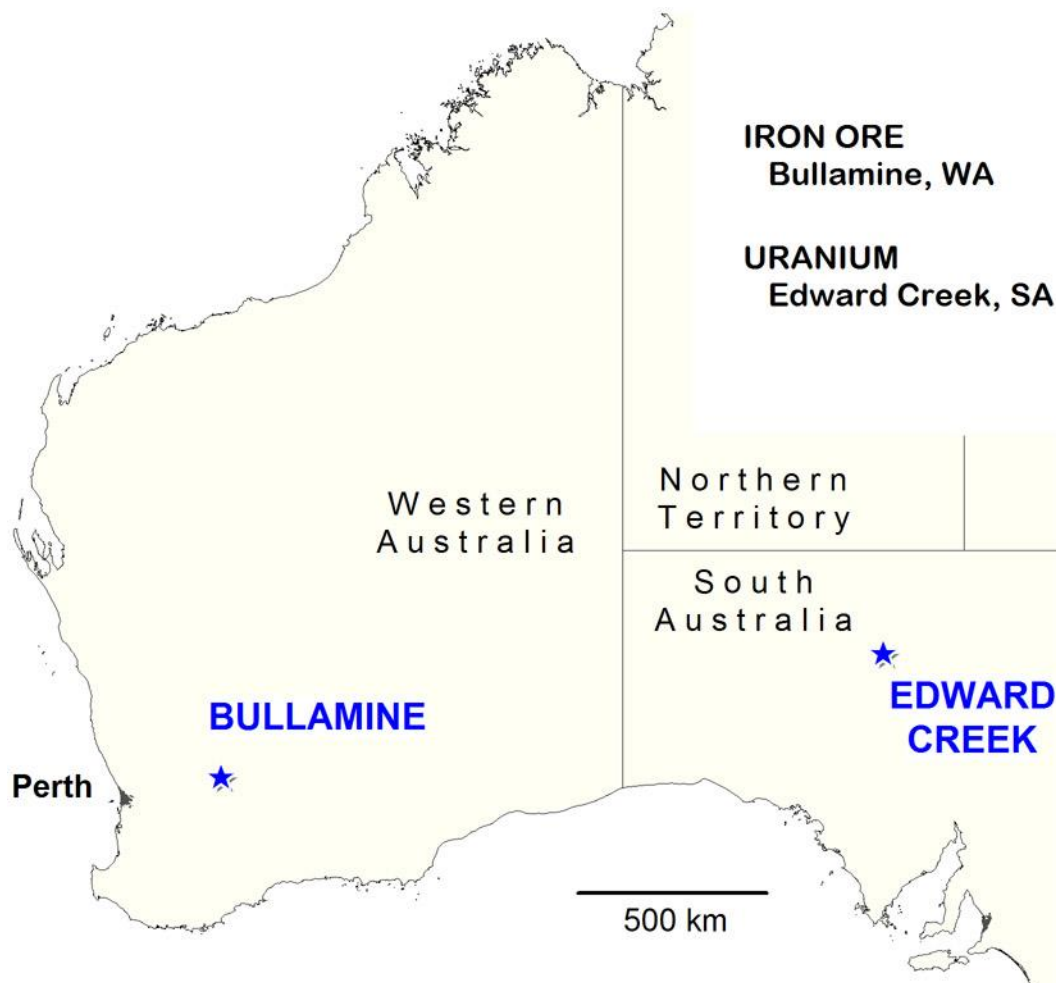

ASX Code: RLC

30 April 2015

Quarterly Report for the period ended 31 March 2015

HIGHLIGHTS

- Bullamine – Magnetite iron ore (WA):
 - Project areas rationalised and reduced to retain Chitterberrin and Burracoppin prospects only.
- Negotiations underway for acquisition of a new gold project.

CURRENT EXPLORATION ACTIVITIES

Bullamine Iron (Magnetite) (WA)

Iron (magnetite)

At the date of this report the tenements held comprise:

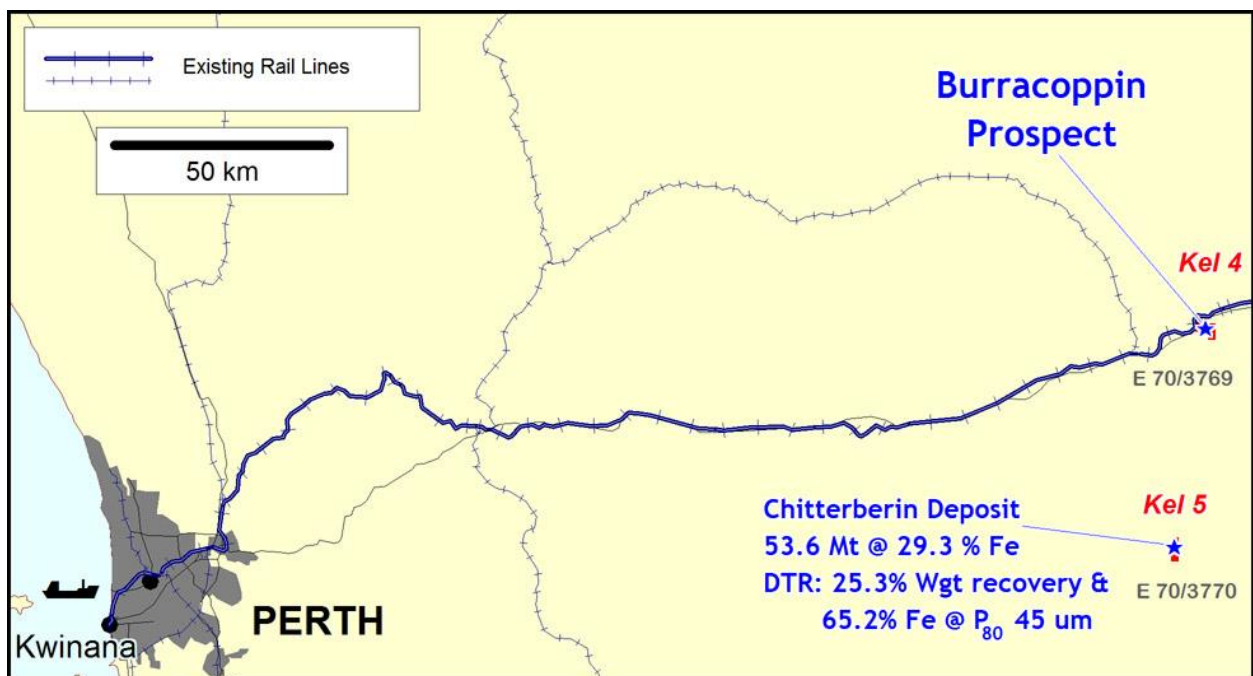

RLC 100% : E70/3769 & 3770

Total area 22.9 km²

During the period the areas held under licence were reduced to cover only the Chitterberin and Burracoppin prospect areas.

Past work has defined an Inferred Resource at Chitterberin (ASX release 22/10/2012) and established the presence of substantial magnetite mineralisation at the Burracoppin prospect where metallurgical studies have shown the mineralization is readily beneficiated into a high iron low impurity concentrate by conventional processing (ASX release 30/01/2015, Quarterly report for the period ended 31 December 2014).

A partner for the project is being sought.

Location of Bullamine tenements and prospects. The Chitterberin Deposit comprises an Inferred Resource described in RLC's ASX Release 22 Oct 2012.

KEL 1 (WA)

Copper / Gold

RLC 100% E70/3766 surrendered 18/04/2015

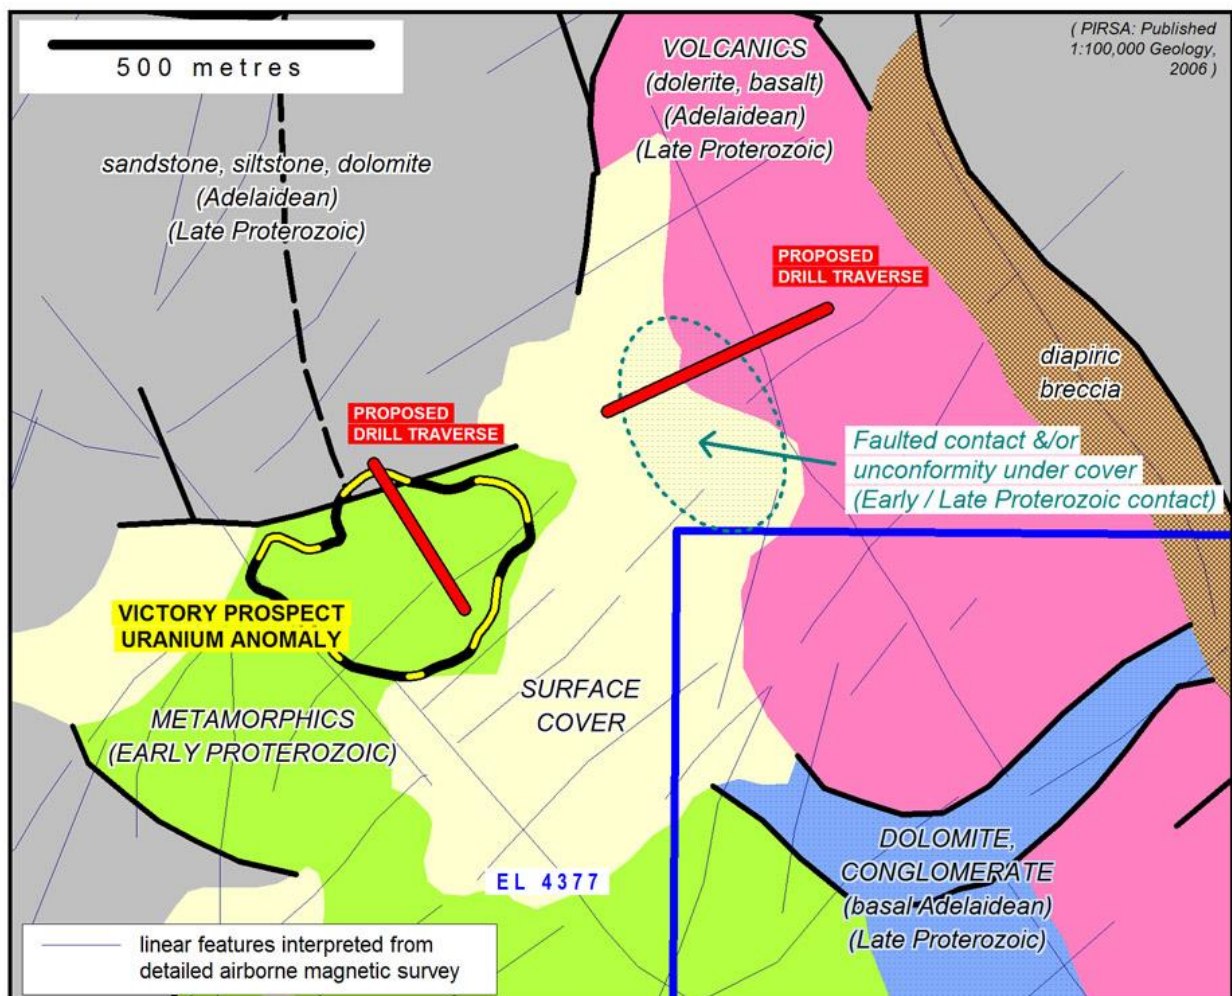

A review of the KEL 1 project resulted in a decision to cease further work and the tenement was surrendered subsequent to the report period at its expiry date on 18 April 2015.

No field activities were undertaken during the period.

Exploration for uranium was postponed. The low uranium price and a joint venture partner maintaining minimum exploration expenditure on the tenement enable RLC to postpone its planned exploration for uranium without penalty. Any exploration success with uranium in the current period would likely generate very little interest amongst potential joint venture partners and investors.

Work planned on the Edward Creek project includes drilling at the Victory uranium prospect. The drilling, now postponed until market conditions improve, will investigate strong surface uranium anomalism associated with quartz veining and along strike where a concealed unconformity is interpreted. The targets occur where uranium anomalism was identified by sampling in 2010 in a window of exposed, weathered and veined rocks of Early Proterozoic age. Results previously reported (RLC's ASX Release 17 Nov 2010) include assays of surface rock chip and auger samples up to 412 ppm uranium, 0.30 % copper, 0.39 % TREE.

Subsequent licence EL 5580 was granted to take effect from 12/11/2014 covering 343 km² of the 440 km² area previously covered by EL 4377.

Proposed drill traverses at the Victory uranium prospect, Edward Creek project, South Australia (work on hold until market conditions improve).

A review of the Tanami project resulted in a decision to cease further work and the tenement was surrendered and expired on 9/03/2015.

New Project Development

The Company is currently negotiating for the acquisition of a gold project which would involve the recovery of gold from mullock (waste rock left at surface from previous mining activities). At the date of this report a purchase agreement has been drafted but not executed.

The gold project has an existing mining licence so that if acquired and gold grades in the mullock are adequate, recovery of gold could commence quickly, possibly within 6 months.

COMMENT

Net cash outflow for the March 2015 quarter was \$69,191 (including \$10,090 of exploration related expenditure).

At 31 March 2015 RLC had \$39,222 in bank accounts and deposits with no debt.

FORTHCOMING ACTIVITIES

Project	Activity Planned	Timetable
New Project Development	Acquisition of a gold project.	Jun Q
Bullamine <i>Iron - Magnetite</i>	Drilling at the Burracoppin prospect	Sep Q
Edward Creek <i>Uranium</i>	Drilling at Victory prospect	TBD

All exploration activities are subject to contractor availability and funding.

TBD = to be determined

The information in this report that relates to Exploration Results is based on information compiled by Geof Fethers, who is a member of the Australian Institute of Mining and Metallurgy (AusIMM). Geof Fethers is a director of the Company and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for the Reporting of Exploration Results, Mineral Resources and Ore Reserves (the JORC Code). Geof Fethers consents to the inclusion in the report of the matters based on his information in the form and context in which it appears. Where Exploration Results have been reported in earlier RLC ASX Releases referenced in this report, those releases are available to view on the NEWS page of reedylagoon.com.au. The company confirms that it is not aware of any new information or data that materially affects the information included in those earlier releases and, in the case of the estimate of the Mineral Resource, all material assumptions and technical parameters underpinning the estimate in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

Notes

- 1 The quarterly report provides a basis for informing the market how the entity’s activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The “Nature of interest” (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities.** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
